- > 100% of the Oils are certified organic
- > Neutral base for a superior fragrance lift
- > Sulfate Free
- > MPG Free
- > Natural Formulation

MADE IN ENGLAND

## GUIDE RECIPE

Here we show you how to create a simple **Crystal NCO** Soap Bar.

To create your very own set of hand made glycerin soap bars, here is what you'll need:

- > **Crystal NCO** - Slice into meltable chunks
- > Fragrance if you wish
- > Add dried Botanicals if you wish
- > A soap mould and slicer
- > Microwave / Double boiler

**Open / Cut** - Simply open the packaging, safely cut the Crystal soap base into smaller cubes, doing this will make the soap easier to handle and melt.

**Melt** - Gradually heat the soap base ensuring that the soap melts evenly and does not boil and burn. If you are melting in a microwave please be careful and keep an eye on the soap as it can bubble over the container.

**Mix** - You can use Essential Oils, Fragrances, Colours, Botanicals and Additives. Simply add to the melted soap base, mix gently ensuring that any fragrance you have added is evenly distributed throughout the soap base.

**Pour** - Working quickly, simply pour your soap base into your soap mould. At this point you can add dried botanicals to the surface of the soap, by gently pressing them into the top of the soap if you wish.

**Create** - Once your soaps have set and fully hardened simply remove from the moulds. We recommend always wrapping your soap bars immediately after releasing from the moulds to protect and preserve the soap.

## PACKAGING

Crystal Melt & Pour soap bases are available in a range of packaging, just pick a size that suits your needs:

- > 1KG Tray / 2LB
- > 11.5KG Box / 25LB
